

# Mule Deer Fawns:100 Does - 2023

Mean number of mule deer fawns per 100 does in Alberta WMUs, based on the trips (surveys) completed in ABHuntLog between September 1 and December 31, 2023. WMUs with grey boundaries had no mule deer data submitted, while those with thin black boundaries had mule deer observations but no doe data collected so a fawn ratio could not be calculated.
